

FOR IMMEDIATE RELEASE

September 2, 2009

Internet Security firm, Calyptix Security, has partnered with IntegrIT Network Solutions, Inc., a leading provider of IT support services for Small Businesses in Snohomish and King Counties, to offer comprehensive security, services resources, and expertise.

Small businesses can leverage Calyptix-IntegrIT Network Solutions, Inc. relationship to ensure that the highest level of internet security services are in-place to safeguard their sensitive data.

IntegrIT Network Solutions, Inc. will work with Calyptix Security to integrate the AccessEnforcer™ Internet security product into their clients networks with Microsoft's Small Business Server (SBS), Essential Business Server (EBS) and other leading solutions to provide a more efficient alternative to traditional vendor support.

"We're excited about the opportunity this partnership presents to deliver a solution purposely built for small and medium businesses and the network infrastructure they depend on," comments Larry Owens, President of IntegrIT Network Solutions, Inc. "By combining our focus on the needs of small businesses, we deliver timely and affordable solutions to their customers."

ABOUT INTEGRIT NETWORK SOLUTIONS, INC.

IntegrIT Network Solutions, Inc. expertise includes a wide range of SMB technologies including Exchange, SQL, Sharepoint, Virtualization, Active Directory, DNS, Macintosh, AccessEnforcer, ISA, SBS, EBS, and general networking. www.integrit-network.com

ABOUT CALYPTIX SECURITY

Calyptix manufactures and sells AccessEnforcer, an all-in-one security appliance tailored to work with Microsoft's Small Business Server, related server products and Active Directory to provide network security and control of users, groups and devices from a single interface in a plug & play format that is simple to deploy, activate and maintain. www.calyptix.com
